Treatment

Alcohol, Drug, and Other Addiction Services for people 18 and older

Intensive Outpatient Treatment – services include, but are not limited to: individual and group counseling, crisis intervention, drug screening, and case management.

Women and Family Services Intensive Outpatient Treatment - designed for women in need of treatment for drug and/or alcohol addiction. Services include group and individual counseling, case management, mental health evaluations, trauma treatment, parenting, nutrition, HIV/STD education and vocational preparation and placement services.

Non-Intensive Outpatient Treatment – is available for individuals in need of treatment for alcohol/drug use that is negatively impacting their life. The program consists of group and individual therapy, case management, drug testing, crisis intervention, family education and therapy, as well as linkage to a 12 step-program.

Medication Assisted Treatment - MAT is available for clients who meet criteria for opiate use disorder combined with Intensive Outpatient Opiate Specific treatment 4 days each week. Our prescribers use both buprenorphine and naltrexone to treat individuals in the program and individuals receive, medical, counseling, educational, and treatment services, in addition to the prescribed medication. Our MAT program provides a comprehensive, individually tailored program of medication and behavioral therapy. MAT medications relieve the withdrawal symptoms and psychological cravings that cause chemical imbalances in the body. This program provides a safe and controlled level of medication to overcome the use of an abused opioid.

Case Management - services are provided for clients participating in outpatient and intensive outpatient treatment services. Case management activities are designed to assist and support clients in gaining access to needed medical, social, educational, and other services essential to meeting basic human needs. Case management services may include interactions with family members, other individuals or entities.

Partial Hospital Program - PHP is a time limited, structured 5 day a week program of multiple and intensive psychotherapy and other therapeutic services provided by a multidisciplinary team.

Gambling - treatment services are free of charge to both the gambler and their family members. Family treatment can occur in conjunction with or separate from treatment with the gambler.

Mental Health

Pharmacological Management - includes psychiatric evaluation, prescription and supervision of medication, medication injections, and medical interventions.

Behavioral Health Counseling - insight-oriented and solution-focused counseling is provided by licensed clinicians to individuals and groups.

Community Psychiatric Supportive Treatment: (CPST) – CPST Specialists provide referrals, linkage to care, and advocacy for clients diagnosed with severe mental illness. Psychiatric Supportive Treatment is also offered in group settings with topics such as anger management, coping skills, and emotion regulations.

Dual Diagnosis

Mentally Ill/Chemically Addicted Intensive Outpatient Treatment -Services to individuals who are dually diagnosed with a serious mental illness and a substance use disorder, when their mental illness is their primary diagnosis.

Chemically Addicted/Mentally Ill Intensive Outpatient Treatment - Services to individuals who are dually diagnosed with a serious mental illness and a substance use disorder, when the addiction is the primary diagnosis and presenting problem.

Integrated Care

Recovery Resources provides Integrated Behavioral and Primary Health Care in partnership with MetroHealth to address clients whole health needs. Clients with a severe mental health diagnosis are eligible and clients with a significant chronic illness are encouraged to participate. Integrated Care Services include a licensed professional to help assist in communication and coordination between primary and behavioral health providers; periodic monitoring of physical health markers; participation in nutrition and exercise groups; and on-site primary and dental care.

Criminal Justice/Conditional Release

Conditional Release Unit - a highly specialized unit providing a range of services to persons found not guilty by reason of insanity (NGRI) or incompetent to stand trial. These services include assessment, community psychiatric supportive treatment, counseling, and pharmacologic management services. Referrals accepted through the state psychiatric hospital and the Cuyahoga County Justice Center.

Parole Assertive Community Treatment - an intensive case management program serving severely mentally ill offenders who have been released on parole and who are referred by the Department of Rehabilitation and Corrections.

Forensic Liaison Program - Assists with early identification of mentally ill offenders in the county and municipal court systems and provides assessment, referral and linkage services for offenders who are eligible for release.

Mental Health/Developmental Disability (MHDD) Program - The MHDD Program provides community psychiatric supportive treatment, counseling, and pharmacologic management services for mentally ill probationers referred by the Cuyahoga County Court of Common Pleas.

Comprehensive Reentry Services - Men and women in the County Jail participate in programs that work on issues including addictions, coping strategies, positive decision making, literacy, and employment prior to release.
